

ALFA Mini

The MINI 56 – the alfa mini 56 is a shallow burial container that boasts all of the benefits of in-ground systems but can have the garbage removed manually, taking a standard garbage bag. The mini 56 works well as a companion container to the maxi series as a recycle collector.

Equal to 1 park basket

The MINI 82 – the tall mini is buried 3 feet in the ground and has 30% more capacity than the standard mini. Because of its total height some compaction is achieved allowing more refuse to fit into the mini 82 making for an efficient and compact container. This container requires a lift system for garbage removal.

Equal to 2 park baskets

Ideal for: parks/beaches, universities/colleges/schools, playgrounds/recreational areas, trail heads/dog walk parks, golf courses, transit/urban centers, roadside rest areas, camp grounds and residential service to name a few.
